

4.01 Detailed Business Entity Report (Business Process Report)

Overview: Visibility into all inbound and outbound interactions to a Business Process

Recommended Parameters:

- Interaction Type: Select a specific interaction type (All, Incoming, Outgoing, Callback)
- Interaction Result(s): Select a specific interaction result (All, Abandoned, Handled, Leave Number)
- Demands: Display only the interactions which routed with a selected Demand(s)
- Business Process Name: Display only the interactions routed within a selected Business Process(s)
- Show Interaction Segments: Displays the details for each interaction

Customer Database	EIP Support	Time Zone:	(UTC-04:00) Eastern Time (US & Canada)
Manual Start Date:	8/17/2020		12:00 AM
Manual End Date:	8/24/2020		12:00 AM
Period	Today	Display Language:	English
Calculated Start Period	8/24/2020 12:00:00 AM	Calculated End Period	8/25/2020 12:00:00 AM
Interaction Type	- ALL -	Business Process Name:	- ALL -
Agent Name	- ALL -	MediaType	- ALL -
Interaction Result(s):	- ALL -	Show Only Interactions With Remarks:	<input type="radio"/> True <input checked="" type="radio"/> False
Disposition Code(s):	- ALL -	Show Interaction Segments:	<input checked="" type="radio"/> True <input type="radio"/> False
Demands	- ALL -	Only interactions ended in "Do Not Call"	<input type="radio"/> True <input checked="" type="radio"/> False
Include archived data	<input type="radio"/> True <input checked="" type="radio"/> False	Enable Pagination	<input type="radio"/> True <input checked="" type="radio"/> False
Group By	None		

Recommended Export Type: Excel (Details) or CSV (Summary)

Key Report Information:

- Interaction Result - Leave Number – Will display interactions which opted in for Queue Callback. These interactions would originate with an **Interaction Type** of **Incoming** and return as **Interaction Type** of **Callback**.
- Interaction Remarks are displayed within this report. This is useful for tracking after hours or overflowed interactions configured with appropriate remarks within Setup. To do so enable the **Show Only Interactions With Remarks** parameter.
