## Overview

This guide is meant to prepare Evolve IP customers for development using the application programming interface (API) provided by Dubber for integration with cloud hosted call recording solutions.

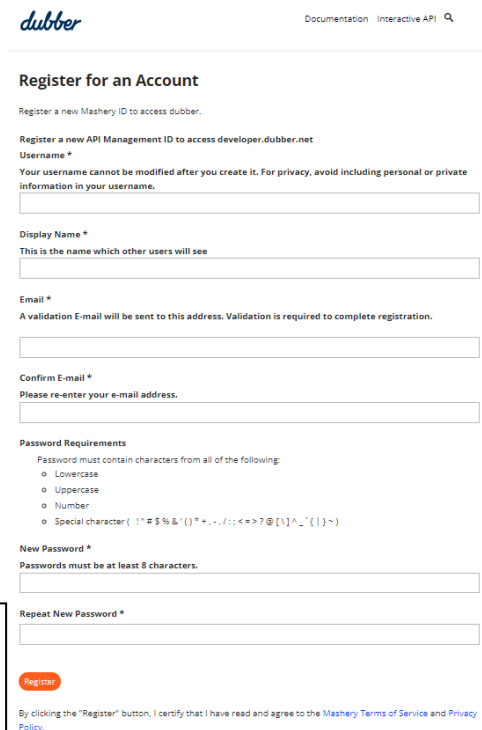

## Pre-requisites

The very first steps in developing with the Dubber API are as follows:

**Programming Experience** – Developing with APIs is not extremely difficult, but it is also not meant for a beginner. Evolve IP strongly encourages the developer undertaking this task to be experienced and knowledgeable in creating applications and API programming. Evolve IP shall only provide access to self-service resources to support these efforts and will not provide any guidance or consulting on programming practices or support for the applications developed using this API. Dubber has many partners with pre-written integrations for its platform that may be better suited if your organization does not have programming expertise on your staff.

<https://www.dubber.net/marketplace>

**Register for a Developer Account** - Visit <http://developer.dubber.net> and click on REGISTER. This will create a Mashery ID that is unique to you. This process includes an approval phase. Dubber will approve your registration within two (2) business days. Approved registration comes with a free 30 day Sandbox for development and testing. Sandbox accounts are not created nor maintained by Evolve IP.

**dubber** Documentation Interactive API

### Register for an Account

Register a new Mashery ID to access dubber.

Register a new API Management ID to access developer.dubber.net

**Username \***  
Your username cannot be modified after you create it. For privacy, avoid including personal or private information in your username.

**Display Name \***  
This is the name which other users will see

**Email \***  
A validation E-mail will be sent to this address. Validation is required to complete registration.

**Confirm E-mail \***  
Please re-enter your e-mail address.

**Password Requirements**  
Password must contain characters from all of the following:

- Lowercase
- Uppercase
- Number
- Special character ( ! " # \$ % & ' ( ) \* + , - . / : ; < = > ? @ [ \ ] ^ \_ { | } ~ )

**New Password \***  
Passwords must be at least 8 characters.

**Repeat New Password \***

**Register**

By clicking the "Register" button, I certify that I have read and agree to the [Mashery Terms of Service](#) and [Privacy Policy](#).

Dubber Developer registration page.  
Creates an API Management ID (Mashery ID)

**Create an application** - begin by creating an application, this will generate a Keys and Client Secret for the relevant Dubber instances. You may then Register the application.

### Register an Application

Get a key and register your application using the form below to start working with our APIs.

#### Register Your New Application

Name of your application (you can change it later) \*

Web Site

Please describe what your application will do

Register Callback URL

Issue a new key for Dubber Sandbox Package

Dubber Sandbox Plan

Playground sandbox environment

Key Rate Limits

2	Calls per second
5,000	Calls per day

Issue a new key for Dubber US Prod package

Production package from Dubber US

Dubber US Prod Plan

Plan for US Prod

Key Rate Limits

2	Calls per second
5,000	Calls per day

## Types of Keys and IDs

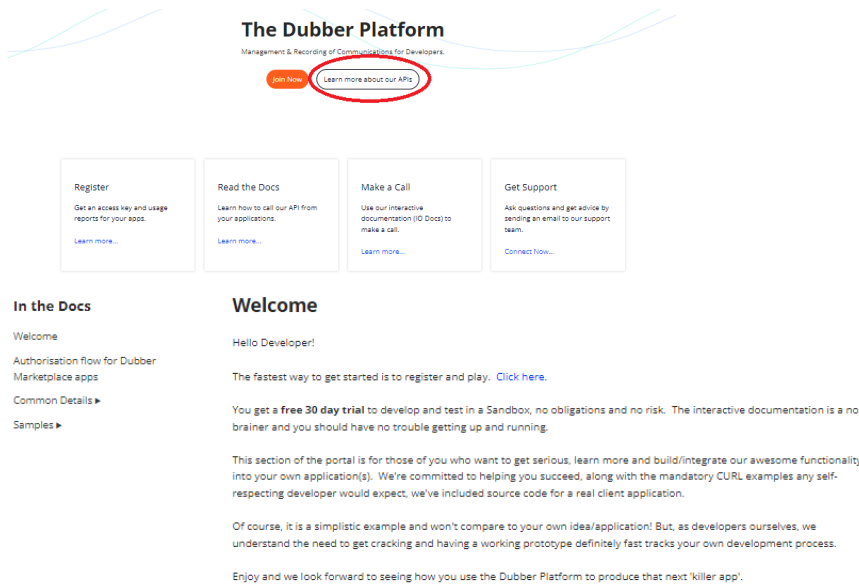

Once the pre-requisites are completed and understood, you are ready to get started. The following is a list of IDs / Keys / Tokens and how/when/where they are obtained:

- **API Management ID** - created upon Dubber developer registration. User generated through registration process. This is also referred to as your Mashery ID, and consists of a username and password that allows you to login to [developer.dubber.net](http://developer.dubber.net).
- **Application Key/Client Secret (Sandbox)** - created upon development account registration and creation of first application. Provided to the user directly from the Dubber Developer portal.
- **Application Key/Client Secret (Production)** - assigned upon application creation for regions selected, requires approval that takes up to two (2) business days. Provided to the user directly from the Dubber Developer portal.
- **Sandbox Account ID** - Will generally match the API Management ID, can be validated by calling profile API as detailed later in the document.
- **Production Account ID** - Provided by Evolve IP when production account is created. Visible by logging into your Production Account Portal via Evolve IP's Clearlogin.

- **Administrative User ID** – Provided by Evolve IP when production account is setup. This is the user that has admin permissions over your Dubber Production Account.
- **Auth ID / Token** – available to Client administrative user(s) in Production Account Portal accessed through Evolve IP’s Clear Login. Can be used to generate an Access Token
- **Access Token** – a bearer authentication token that is used to authenticate each API call to Dubber. Available from the Dubber API following their “Authorization” guides to generate the token. (either by Password, Code, or Bearer Assertion)

## API Documentation

Dubber has provided a comprehensive documentation site at [developer.dubber.net](http://developer.dubber.net). Visit that site for API documentation.

## API Application Responsibilities Matrix

Here are the expected responsibilities for tasks related to API development with Dubber:

**R** – Responsible | **A** – Accountable | **C** – Consulted | **I** – Informed

<b>Pre-Requisites</b>	<b>Evolve IP</b>	<b>Client</b>	<b>Dubber</b>
Programming Experience		RA	
Register on Dubber Developer Portal	C	RA	I
Create Application(s)	I	RA	I

<b>Development</b>	<b>Evolve IP</b>	<b>Client</b>	<b>Dubber</b>
Request Application Keys	I	RA	I
Approve Application Keys	C	I	RA
Setup Dubber Sandbox Account	I	RA	C
Maintain API Documentation	I	I	RA
Write API Calls	I	RA	C
Test Against Sandbox	I	RA	C
Monitor API Availability	R	I	A
Monitor Application for API Errors	I	RA	C
Provision Dubber Production Account	RA	C	I
Provide Production Account ID	RA	I	
Setup Administrative Dubber User(s)	RA	I	
Enable API Access	RA	I	
Obtain Production Auth ID / Token	C	RA	

## Testing

Dubber provides an interactive API to test your application. This will be done using the Key and Client secret provided for the Sandbox portal on your Developer account. It should be noted that the Sandbox will not contain any of your recordings from Evolve IP. This is a test account and will be registered using the same email address as your Dubber Developer account.

---	---	---	--

The screenshot shows the Dubber Interactive API interface. At the top, there is a navigation bar with the Dubber logo, 'Documentation', 'Interactive API', and 'My Account Sign Out'. The main heading is 'Interactive API'. Below this, there is a dropdown menu for 'Dubber Sandbox'. A section titled 'OAuth 2.0 Flow:' contains two dropdown menus: 'Authorization Code / Web Server' and 'Existing Client Credentials: Example App'. Below these are two input fields: 'Client ID:' with the value 'h3' and 'Client Secret:' with the value 'h4'. An orange 'Authorize' button is located at the bottom of the form.

Obtaining your account ID is as simple as selecting the application you created from the existing Client credentials which will prepopulate your ID and Secret. You then select "Authorize" which will require you to enter your credentials for your Dubber Sandbox Account.

If you have not yet created the Sandbox account you can enter your email address at the Forgot password link here: [https://idp.sbox.dubber.net/auth/realms/dubber/login-actions/reset-credentials?client\\_id=dubber&tab\\_id=zom0zNFZrFA](https://idp.sbox.dubber.net/auth/realms/dubber/login-actions/reset-credentials?client_id=dubber&tab_id=zom0zNFZrFA) and follow the process to establish a password and activate the account.

Once you provide the credentials for your Dubber Sandbox Account the interactive API will generate an authorization code and allow you to get an access token.

Accessing your Sandbox Account ID can be done by calling the profile API.

### Profile Methods

**GET** Get Profile /sandbox/v1/profile

Gets the authenticated profile

Try it! [Clear Results](#)

**REQUEST URI**

`https://api.dubber.net/sandbox/v1/profile`

**REQUEST HEADERS**

[Select Content](#)

`Authorization: Bearer h3kjumrhwfqckynqy4d7euym`  
`X-Originating-IP: 98.53.222.159`

**REQUEST STATUS**

[Select Content](#)

`200 OK`

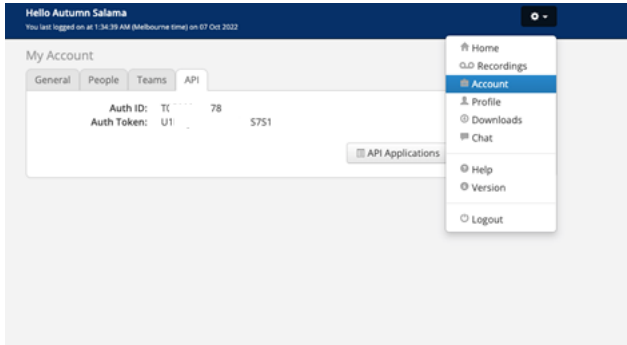

The response to this call will have your account details:

```
{
  "self": "https://api.dubber.net/sandbox/v1/users/yourname-domain-com",
  "account": "https://api.dubber.net/sandbox/v1/accounts/AccountID",
  "id": "yourname-domain-com",
  "role": "Administrator",
  "username": "yourname@domain.com",
  "first_name": "First Name",
  "last_name": "Last Name",
  "confirmed": true,
  "date_created": "Day, ## Month 2022 HH:MM:SS +0000",
  "date_updated": " Day, ## Month 2022 HH:MM:SS +0000",
  "mobile_number": "#####",
  "language": "en"
}
```

## Production Access

Evolve IP will provision your Production Dubber account in accordance with the service to which you have subscribed. As part of provisioning this account, Evolve IP will configure administrative users as detailed by the Client in the Implementation Workbook. Where requested, user API access will be enabled. Once enabled the administrative user(s) can obtain the Auth ID and Token related to their account which will be necessary for accessing your production account via the API through the Production Dubber portal. Users access the

Production Dubber Portal through Evolve IP’s ClearLogin by selecting tile titled “Cloud Hosted Call Recording”. Once in the Production Dubber Portal clicking on the gear icon in the upper right hand corner and selecting “Account” you can navigate to the API tab on your Account Settings page and view your Auth ID and Token. It should be noted for security reasons, Evolve IP cannot see this information nor provide it to you.

You can now leverage your Production Key and Client Secret paired with your Authorization ID/Token to make API calls against your production Dubber Account. Examples of the API calls available to you can be found with the API documentation links provided earlier in this document.

It should be noted that all examples use the sandbox instance. When making calls in production “sandbox” should be replaced with the production Dubber region you are making the calls to, usually “us” for customers based in the Continental US.

### Sandbox Example:

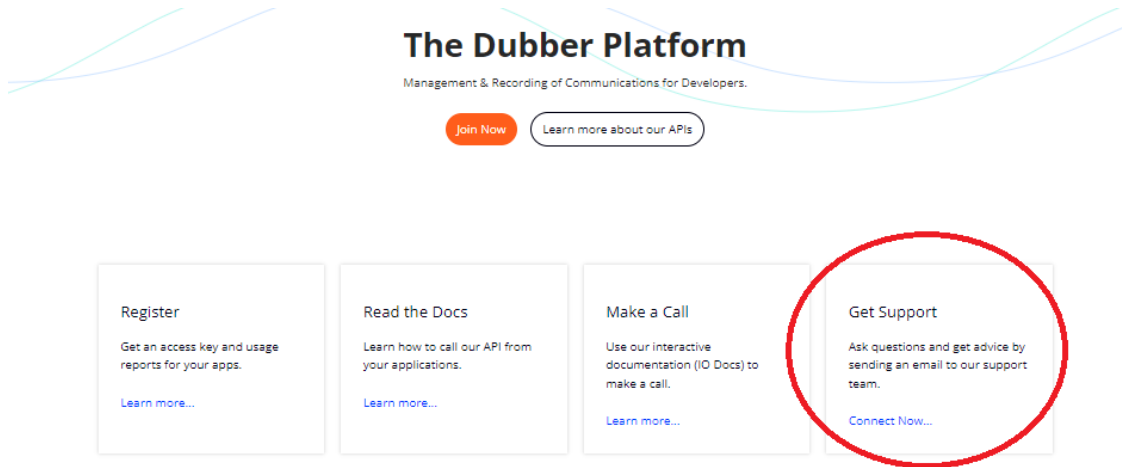

```
curl -i -k -H "Authorization: Bearer <ACCESS_TOKEN>" \
-X GET "https://api.dubber.net/sandbox/v1/accounts/<Dubber_Account_Id>"
```

### US Production Equivalent:

```
curl -i -k -H "Authorization: Bearer <ACCESS_TOKEN>" \
-X GET "https://api.dubber.net/us/v1/accounts/<Dubber_Account_Id>"
```

## Support

If your sandbox is active, you can open support tickets directly with Dubber for issues related to API application development. Click on the 'Get Support' link from the home page.

*Evolve IP does not provide support or development assistance for customers building against the Dubber API.*
